Handbook of Conflict Analysis and Resolution

This major new handbook comprises cutting-edge essays from leading scholars in the field of conflict analysis and resolution (CAR).

The volume provides a comprehensive overview of the core concepts, theories, approaches, processes, and intervention designs in the field. The central theme is the value of *multidisciplinary* approaches to the analysis and resolution of conflicts. This consists of moving from the study of analytical approaches to understanding the deep-rooted causes of conflict, to third party intervention approaches to preventing or ending violence, and to resolving and transforming conflict.

The book is divided into four main parts:
